International Journal of Theoretical Physics

Volume 23, Number 1 January 1984

Contents

Group Contraction and the Nine Cayley–Klein Geometries, *M. A. Fernández Sanjuan* 1

Three-Body Model for Stripping Nuclear Reactions, *Ahmed Osman* 15

Critical Comments on the Discussion about Tachyonic Causal Paradoxes and on the Concept of Superluminal Reference Frame, *Jerzy Klemens Kowalczyński* 27

Group Fields, Gravity, and Angular Momentum, *J. G. Williams and David Finkelstein* 61

Sheaf Models and Massless Fields, *Richard Jozsa* 67

International Journal of Theoretical Physics

Volume 23, Number 2 February 1984

Contents

New Approach to Perturbation Theory of Many-Particle Systems, *C. J. Lambert and W. E. Hagston* 99

Maximal Indecomposable Past Sets and Event Horizons, *Andrzej Królak* 125

Spinor Fields in Non-Abelian Klein–Kaluza Theories, *M. W. Kalinowski* 131

Quantum Mechanics as a Stochastic Process with a $U(1)$ Degree of Freedom, *B. Rosenstein* 147

Foundations of Phase-Space Quantum Mechanics, *W. Guz* 157

Lorentz Invariance, Approach to Helicity, and Gauge Transformations for Spin-1, *Tino Ahrens* 185

Errata 195

International Journal of Theoretical Physics

Volume 23, Number 3 March 1984

Contents

Geometry of the SU_3 Group, *Jerome Epstein and E. L. Schucking* 197

Quantum Logics Derived from Asymmetric Mielnik Forms, *Platon C. Deliyannis* 217

Classical Limit of a Relativistic Quantum System, *Hans H. Grelland* 227

Third Quantization Formalism for Hamiltonian Cosmologies, *N. Caderni and M. Martellini* 233

Polarized Electron Scattering on Spin Zero and Polarized Spin-1/2 Targets: Deep Inelastic Scattering, Elastic Electron–Muon Scattering, and Elastic Electron–Nucleon Scattering, *Theodore Garavaglia* 251

International Journal of Theoretical Physics

Volume 23, Number 4 April 1984

Contents

Are Goldstone Neutrinos Responsible for the Solar Neutrino Puzzle?, *A. Das* 295

Complete Gauge Theory for the Whole Poincaré Group, *R. Aldrovandi and E. Stédile* 301

Conditional Stability of Multiple-Charged Solitons, *Yu. P. Rybakov and S. Chakrabarti* 325

Scattering of Klein–Gordon and Maxwell Waves by an Ellis Geometry, *Gérard Clément* 335

Bound States of a Gravitational Soliton and a Test Particle, *Gérard Clément* 351

Eight-Dimensional Spinor Representation of the Poincaré Group, *G. H. Derrick* 359

International Journal of Theoretical Physics

Volume 23, Number 5 May 1984

Contents

The Preferred Null Symmetries of a Null Electromagnetic Field Interacting with a Null Free Gravitational Field, *L. Radhakrishna and S. P. Gumaste* 395

Inadequacy of Hydrodynamical Theories of the Aharonov–Bohm Effect, *A. Joseph Zuchelli* 407

Infinite Conductivity and Perfect Diamagnetism in Type-I Superconductors, *G. Papini* 417

Segal's Mechanism for the Red Shift and Its Physical Bases, *Jan Tarski* 425

Application of Schiff's Rotating-Frame Electrodynamics, *Ø. Grøn* 441

Sigma Model for Ernst Equation: Lax Representation, Bäcklund Transformation and Divergence-Free Currents, *E. V. Doktorov and A. N. Tarakanov* 449

Conserved Quantities, Invariant Forms, and Dynamical Symmetries, *Giacomo Caviglia* 461

Particle Production by Charges in Condensed Matter, *Miroslav Pardy* 469

Canonical Quantization of 1+1 Dimensional Gravity, *Tom Banks and Leonard Susskind* 475

Erratum 497

International Journal of Theoretical Physics

Volume 23, Number 6 June 1984

Contents

Trilocal Structures. V. Wave Equations, *Roger E. Clapp, Evelyn W. Mack, Fay Simons, and Joseph A. Wolf, Jr.* 499

Electrodynamical Origins of Einstein's Theory of General Relativity, *F. R. Hickman* 535

Feynman's Formula for a Harmonic Oscillator, *I. H. Duru* 567

Gravitation as an Averaged Theory, *M. N. Mahanta* 569

Generalization of Lagrangian Dynamics, *B. V. Pomorišac* 575

International Journal of Theoretical Physics

Volume 23, Number 7 July 1984

Contents

Stochastic Interpretations of Nonrelativistic Quantum Theory, *B. H. Lavenda and E. Santamato* 585

Tensor Product of Generalized Sample Spaces, *Patricia F. Lock and Robin H. Lock* 629

Introduction to Majorana Masses, *Philip D. Mannheim* 643

International Journal of Theoretical Physics

Volume 23, Number 8 August 1984

Contents

Part I. The Loyola Conference

Papers Presented at the Second New Orleans Conference on Quantum Theory and Gravitation, Loyola University, New Orleans, May, 1983

Guest Editor's Introduction, *A. R. Marlow* 675

The Future of Atomic Physics, *P. A. M. Dirac* 677

Rotational Splitting of Global Solar Oscillations and Its Relevance to Tests of General Relativity, *Henry A. Hill* 683

"Time" Replaced by Quantum Correlations, *William K. Wootters* 701

Quantum Effects, Inflationary Model, and Observable Universe, *Marek Demianski* 713

Can Inflation Explain the Second Law of Thermodynamics?, *Don N. Page* 725

Physics from the G-Bundle Viewpoint, *David D. Bleecker* 735

New Connection Between Spinors and Geometry, *Bill Dalton* 751

An Algebraic Approach to Quantum Field Theory and Commutation Relations for Energy Momentum in the Framework of General Relativity, *Joseph I. Goldman* 771

Geometric Quantization in Many-Body Physics, *George Rosensteel* 777

International Journal of Theoretical Physics

Volume 23, Number 9 September 1984

Contents

Part II. The Loyola Conference

Papers Presented at the Second New Orleans Conference of Quantum Theory and Gravitation, Loyola University, New Orleans, May, 1983

Relativistic Quantum Mechanics over Stochastic Phase Space, *J. A. Brooke* 783

The Geometry of Grand Unification, *Thomas R. Love* 801

Space-Time Dual Geometry Theory of Elementary Particles and Their Interaction Fields, *Jaime Keller* 817

Quantum Geometry from Coordinate Transformations Relating Quantum Observers, *Dave Pandres, Jr.* 839

A Geometrical Theory of Spin Motion, *Leopold Halpern* 843

Relativistic Physics from Quantum Theory, *A. R. Marlow* 863

The Quantum Pentacle, *David Finkelstein and Ernesto Rodriguez* 887

Grassmann–Cartan Algebra and Klein–Gordon Equations, *Jerzy F. Plebański* 895

International Journal of Theoretical Physics

Volume 23, Number 10 October 1984

Contents

Nondeterminism Can Be Causal, *Michael J. Manthey* 929

Charge–Magnetic-Dipole Bound States Using the Klein–Gordon Equation, *G. Bruce Mainland and David M. Scott* 941

Operator-Valued Connections, Lie Connections, and Gauge Field Theory, *Dominic G. B. Edelen* 949

The Hypothesis of the $V - A$ Fermion Current Dominance and Neutral Current Interactions, *Josip Šoln* 987

Scattering of a Klein–Gordon Particle by a Black Hole, *N. K. Kofinti* 991

Riemann Curvature Tensor in Nonholonomic Coordinates and Non-Riemannian Space-Times, *Larry L. Smalley* 1001

Gravitation and Irreversibility, *Alexander Neacsu* 1009

Requiem for the Born–Infeld Electron, *George L. Murphy* 1025

Book Review: *Statistical Theory and Random Matrices*, *Giulio Casati* 1029

International Journal of Theoretical Physics

Volume 23, Number 11 November 1984

Contents

Space-Time Structure Near Particles and Its Influence on Particle Behavior, *Kh. Namsrai* 1031

Quantum Relativity Theory and Quantum Space-Time, *Miklós Banai* 1043

Relativity of Topology and Dynamics, *David Finkelstein and Ernesto Rodriquez* 1065

International Journal of Theoretical Physics
Volume 23, Number 12 December 1984

Contents

Extended Feynman Formula for Forced Harmonic Oscillator, *Bin Kang Cheng* 1099

Calculation of the Propagator for a Time-Dependent Damped, Forced Harmonic Oscillator Using the Schwinger Action Principle, *Luis F. Urrutia and Eduardo Hernández* 1105

Power Counting and Regularization through Loop Integrations for Multiple Feynman Integrals in Minkowski Space, *Edward B. Manoukian* 1129

Scattering Theory, Cross Sections, and the Lattice of Propositions, *J. E. G. Farina* 1141

Modalities and Quantum Mechanics, *F. J. Burghardt* 1171

Hadron Physics and Transfinite Set Theory, *B. W. Augenstein* 1197

Alternative Models of the Real Number Line in Physics, *D. K. Ross* 1207

Author Index for Volume 23 1221
